

During 2017, you told us about your workforce and operational issues in general practice (The Resilience Survey Monkey).

We are using your feedback and data to develop a transformation, resilience and sustainability plan for Sheffield GP providers. This plan will help us all to deliver the GP Forward View programmes over the next 12 months.

We can support your practice with the following GP Forward View workstreams:

- Technological solutions for primary care
- Redesign of locally commissioned services
- Access systems and operational developments
- Merger support
- Supporting vulnerable practices
- Workforce development
- Care navigation development and roll out
- Bid writing & business planning support including estates development support

Our team meet fortnightly to discuss the primary care work programme & you will be kept informed with feedback.

Contact us directly if you require support from anyone in our team or support around any of the work programmes.

If you're not sure where to start, email us at Sheffieldccg.primarycare@nhs.net

Introducing our GP Support Managers

To support GP resilience, we are pleased to announce the appointment of five (six due to job share) GP Support Managers. They work with the Primary Care Extended Team one day per week and support GP practices across Sheffield.

Our GP Support Managers have considerable experience in helping shape and transform services in their existing and previous roles. You can read more about each of them on the CCG intranet.
